

This is a courtesy guide to help you identify classes that your bike may qualify to race in, generally listed from most to least competitive classes for a Superstock-legal bike.

In the CMRA, you can race "up a class" but not "down a class". For example, a C Superstock-legal bike can run "up" in the B Superstock class, but not vice-versa. In regard to the Superstock and Superbike categories a Superstock-legal bike can run "up" in the Superbike category, but not vice-versa. See the **2018 Category Courtesy Guide** for more information about categories. There are a few exceptions to these rules (e.g. Classic machines may ride down one class) so it is important to refer to the [2018 CMRA Rule Book](#) for clarification. **Team 60 running mixed-class bikes MUST run in the HIGHER bike class.**

2018 Category Courtesy Guide

rev 1/27/18

"Category" refers to the basic type of machine, performance modifications and tires allowed for competition. This is a courtesy guide to help you understand the main differences between CMRA machine Categories.

Note that in addition to performance modifications which may be allowed by Category rules, all machines must also have specified modifications for track-preparedness/safety purposes (e.g. safety wiring, fluid containing lower fairings, etc).

This is a general overview only – see the [2018 CMRA Rule Book](#) for specific machine and category requirements.

IN CASE OF CONFLICT BETWEEN THIS COURTESY GUIDE AND THE CMRA RULE BOOK,
THE CMRA RULE BOOK APPLIES.

CATEGORY DESCRIPTIONS - listed in order of most modified to least modified	
Formula	Machines purpose-built for racing which were never legal for use on public roads and machines produced for use on public roads. Unlimited performance modification allowed (with a very few safety related exceptions, e.g. carbon fiber wheels are not allowed). Slick racing tires are allowed.
Superbike	Machines produced for use on public roads with almost unlimited performance modifications allowed (E Superbike class alone is more restrictive). Slick racing tires are allowed.
Superstock	Machines produced for use on public roads with specified performance modifications allowed. Performance modifications are limited to specific items including both 'bolt-on' items and specific limited internal engine/transmission/clutch modifications. Slick racing tires are allowed.
Modern Classic and Classic	Machines meeting Superbike Category rules but 2007 or older for Modern Classic and 1997 year or older for Classic. Components used for allowed modifications must have been available in the year-ranges specified for each category. Slick racing tires are allowed.
Motard	Machines produced for 'off-road' and/or 'dual-purpose' (on- and off-road use). Slick racing tires are allowed.
